WE ENGINEER YOUR TARGETED SOLUTION.

Bavis Drive-Thru is one solution that is not just a "quick-fix" replacement, but a reliable and substantial upgrade.

Basic Pneumatic System (BPS)

- 4 1/2" standard tube
- Stainless steel exterior enclosure
- Motors positioned at the base of the exterior vertical allowing for easy access
- All service work can be performed from the front of the equipment
- Microprocessor controlled
- Exterior powered doors
- Interior manual door with magnetic seals
- Industry standard carrier
- Clear tubing
- Rain shield protects microphone and windscreen for greater audio clarity
- Includes exterior customer audio components consisting of microphone, speaker and call button
- Product is compatible with most competitive audio systems
- Operates on single 110v circuit
- One year manufacturer's limited warranty
- A UL listed and classified product

The Bavis Drive-Thru BPS system (above) is far superior to other pneumatic systems the intelligent low-cost choice. If you are considering staying with a pneumatic system consider the APS (below-left) which has substantial upgrades. And, for the ultimate upgrade Consider the TransTrax™ (below-right) and experience the best available Drive-Thru solution in existence.

Advanced Pneumatic System (APS)

Top-End Pneumatic System Not Just Another Pneumatic Tube System

Engineered to solve a number of the problems that plague other tube systems.

- Automatic close/sealing of doors to prevent condensation
- Shut off system to minimize blower run time and extend life
- Powder-coated aluminum vertical (custom colors available)
- Dependable braking action
- Microprocessor LED diagnostics
- Quiet operation
